

A Fresh Alternative To Improve Water Distribution

Repair & Preventative Solutions

Why Is Conn-Professional Water Services The Perfect Partner For Utility Companies?

Simply put, we make it easy! With over 25 years experience working with utility companies in CT, MA and PA, we understand how they operate and what is important to them. Unlike other contractors, this experience gives us the ability to get job done without costly delays and the inability to complete projects efficiently – which saves time while reducing expenses and headaches.

Bonded and insured beyond the normal standards most municipalities require gives our customers the extra confidence and peace of mind.

Water Problems – Corrected.

Conn-Professional offers full-service water line services to utility companies. From simple water meter installations to complicated installations and repairs of water mains and water lines, we eliminate the worry and get the job done – on time and on budget.

Prevention Reduces Bottom Line Expenses.

Our preventative solutions detect problems before they turn into disasters. These preventative steps will reduce future repair cost and keep your product flowing to your customers. We will develop and tailor a preventative solution program around your specific needs.

What Value Can We Offer?

A simple meeting will uncover a variety of needs – it's proven. Call us today to see what we can discover together.
